

Can cut each clip individually or video + sound clips together.

Editing clips

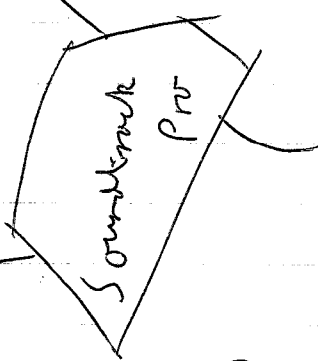

Change levels in terms of 'left and right' in case of the use of headphones

Volume levels edit as either one whole volume level, or make some parts louder, quieter, fade.

choose from sound a list of effects already downloaded to the programme

Pitch - 2 options: pitch shifter in bottom right corner. Search in bottom right corner.

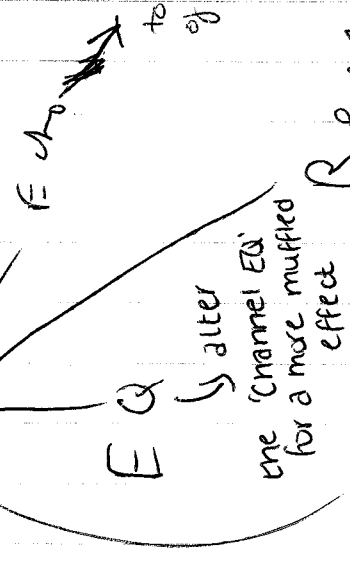

Using different tracks (e.g. - Track 1, 2, 3...)

allows you to edit different clips individually and create different effects, etc.

effects can be used to create a sense of realism eg echo in a cave. They can also be used to break up scenes

# Effects

Reverb effects include: chorus, phaser, ring shifter etc.

distort the track to create the effect of echo

3 options: Flat, number, subtract to revert space designer

Click the 'E' button watch the levels to the right Red means it's too loud.
